EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please replace the Abstract with the following Abstract:

An absorbent article comprising a central absorbent member and a lateral wicking barrier for inhibition of wicking from the central regions of the article to an outlying outer absorbent member. The wicking barrier has a vertical component for prevention of radial wicking in the plane of the article and thus promotes center filling of the article with fluid and reduces the likelihood of leaks from the sides of the article. The wicking barrier can also have a horizontal component to prevent leakage, redirect fluid flow, and improve fit and performance of the article. In one embodiment, the central absorbent member is a concentric absorbent structure having alternating rings of barrier material and absorbent material, including a spiral wound composite formed from a layer of barrier material wound with a layer of absorbent material and then sliced.

Reasons for Allowance

Claims 10, 14 and 38 are allowed.

The following is an examiner's statement of reasons for allowance:

The closest prior art uncovered during examination discloses the following elements:

US 4,973,325 issued to Sherrod et al: teaches an absorbent article having a topsheet and an absorbent core including a fluid transfer member facilitating movement of fluids downward through the core and outward to the periphery of the core.

While the prior art of record discloses various elements of absorbent articles, none disclose or fairly suggest an absorbent article comprising an absorbent core having a centrally disposed void therein in combination with a central absorbent member having multiple vertical layers of barrier material alternating with layers of absorbent material or in combination with a topsheet fold that forms an elevated runoff barrier. These features render the claimed invention non-obvious over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ginger T. Chapman whose telephone number is (571) 272-4934. The examiner can normally be reached on Monday through Friday 9:30 a.m. to 6:00 p.m..
